# Process Portal - Introduction

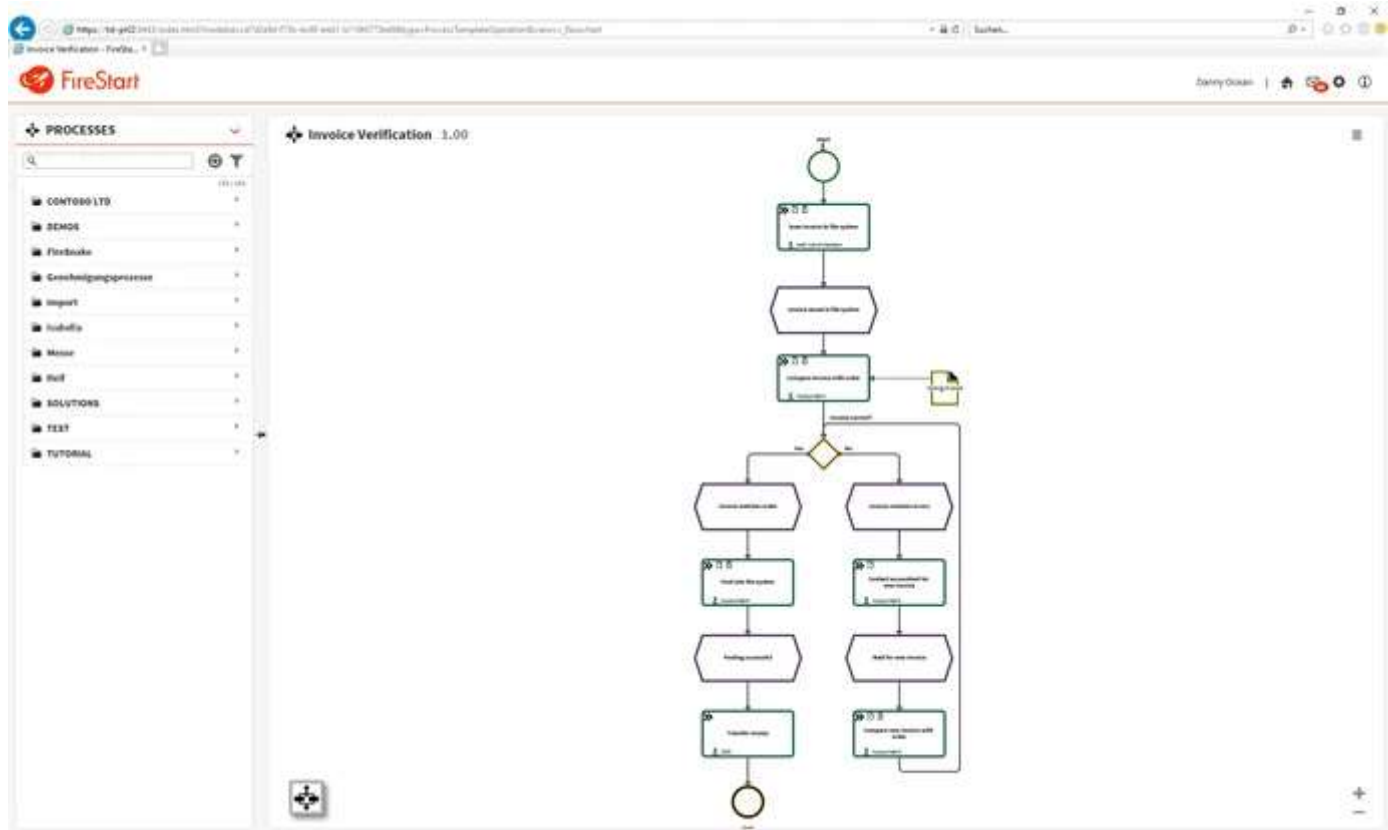

The FireStart Process Portal provides you and your entire organization with quick and functional access to your business processes in a browser-based format.

The navigation panel allows you to dive deep into the structures of your processes and the magnifying glass provides search functionality.

Above the navigation panel, you will also find the distinct modules PROCESSES, PROCESS MAPS, ROLES, DOCUMENTS, DOMAINS, RISKS, IT SYSTEMS, and BUSINESS ENTITIES. Go to the first module and open your process model “Invoice verification”.

Click the three bars in the top-right corner to display additional information for either the entire process or an individual element.
