

Quick Tutorial - Workflow Basics ▾

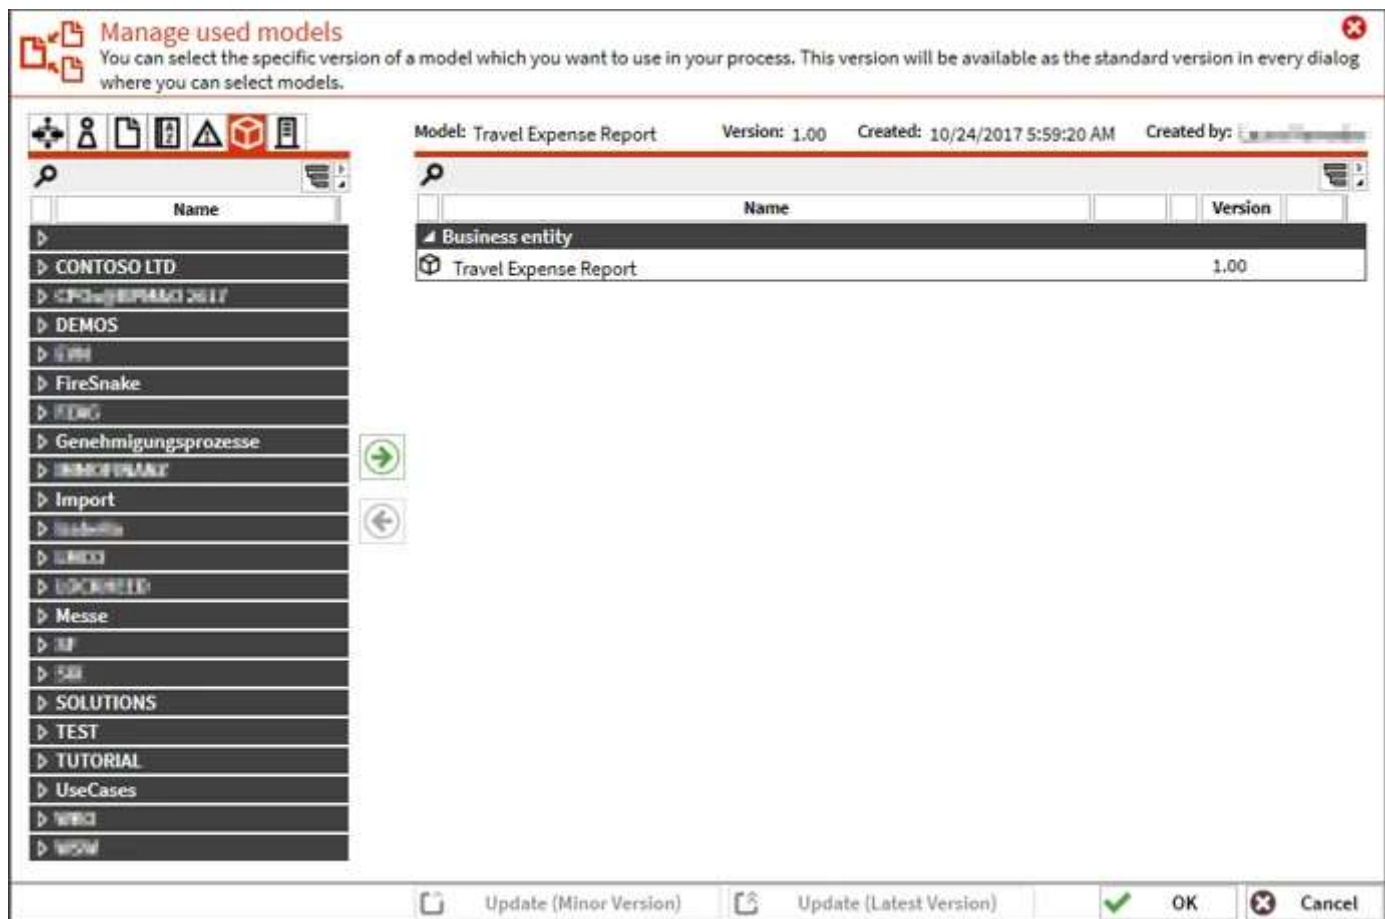

< Back to home

Define Business Entity for Process

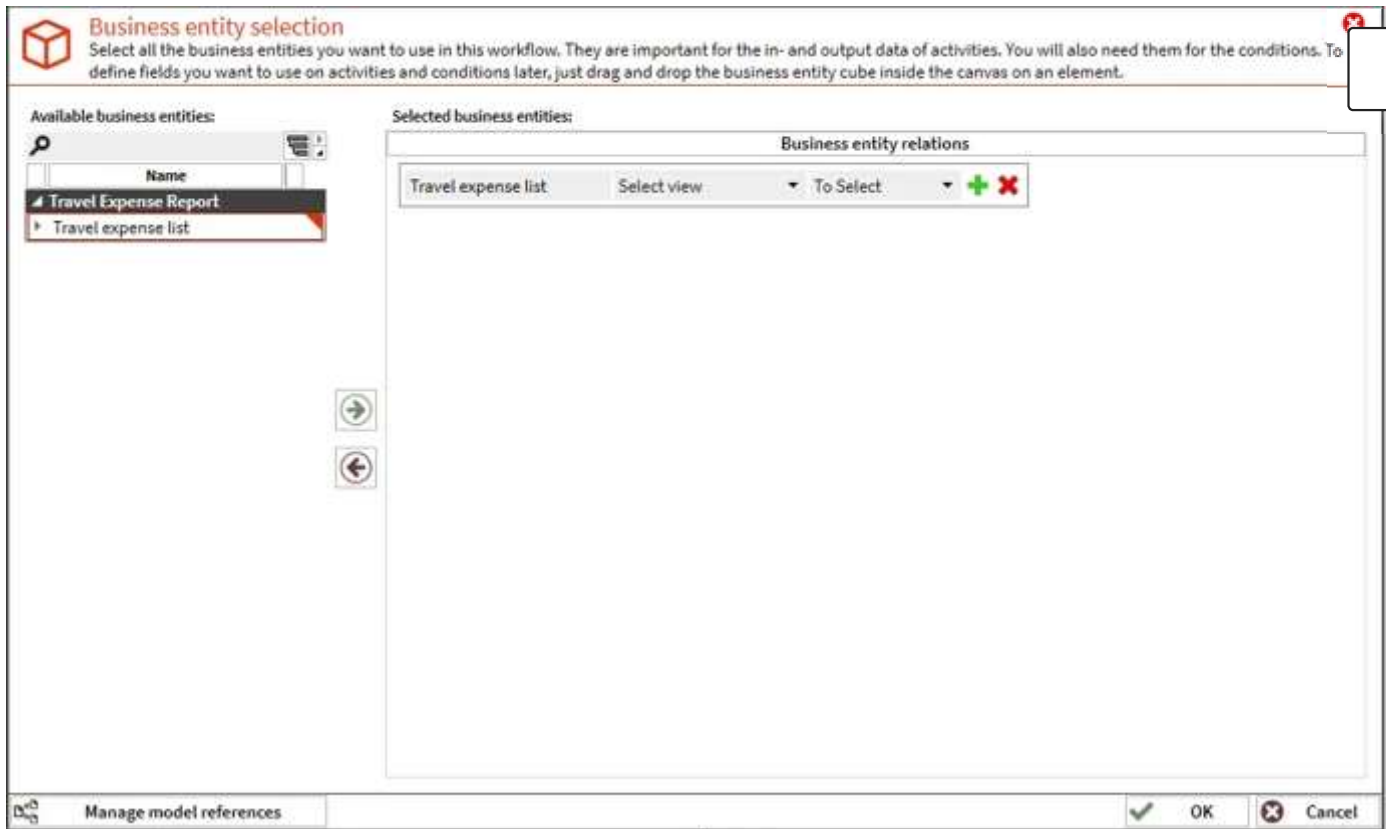

Select the PROCESS designer. Click **Define Business Entity** from the top ribbon menu **Main**.

Select the correct business entity model (travel expense list) in the foreground dialog, double-click it to add it and hit **OK** to close.

In the background dialog double-click the travel expense list on the left side to add it to your process model. Click **OK** to close.

In the upper left corner of the canvas, you can now see the used business entities and workflow variables represented as small cubes.
