Process Portal - Dashboard

My Models (Owner)

My Models (Owner)

This section shows the models owned by you sorted by the time of their last modification. Models with changes since your last visit are highlighted.

My Workflows

My Workflows

Here, the executions of process models owned by you are displayed, sorted by their start date. Only executions of published processes will be shown.

My Tasks

My Tasks

With the FireStart Process Portal, you always have your tasks at hand. The list shows all the new tasks you did not visit already.

Current Workflows

Current Workflows

In this section, all current workflows are shown, as a doughnut diagram. In the legends of the diagram, the name of the execution is displayed.

Favorites

Favorites

A list of all your favorite models. You can remove models from your favorite list by hovering over them and clicking on the delete icon.

Completed Tasks

Completed Tasks

The completed tasks will be shown in a line chart. The months will be used as line points. E.g., if you complete lots of tasks in June then your line chart point will move up.

My Roles

My Roles

This section displays the role models and roles you are a part

of. You can navigate to the model or show the usages of your roles by clicking on them.

Recent Models

A list of the most recently viewed models you have opened is shown with the date and time of your last visit.

My Models (Participant)

All models where you are directly or indirectly involved, are displayed in this section, sorted by the time of their last modification. Models with changes since your last visit are highlighted.

My Documents

All documents associated with elements where you are directly or indirectly involved can be viewed here. They are grouped by the model they are related to.
