

Advanced Modeling ▾

< Back to home

Delete Connection Templates

To delete unused Connection Templates, open **Menu > Preferences > Data Connections > Connection Templates**.

Data Connections

Preferences << Business entity mappings **Connection Templates** Credential Templates

Name	Description	Credential Name
▶ Mail SMTP Test -FS		Cred Mail SMTP Test FS
▶ SMTP with SSL		SMTP Cred Template
▶ EWSTemplateTest		Basic Auth Cred Template
▶ KD Test Con Template		KD Test Cred Template
▶ EWS Template KD		EWS Cred Template KD
▶ EWS Connection Template		EWS Credentials Template

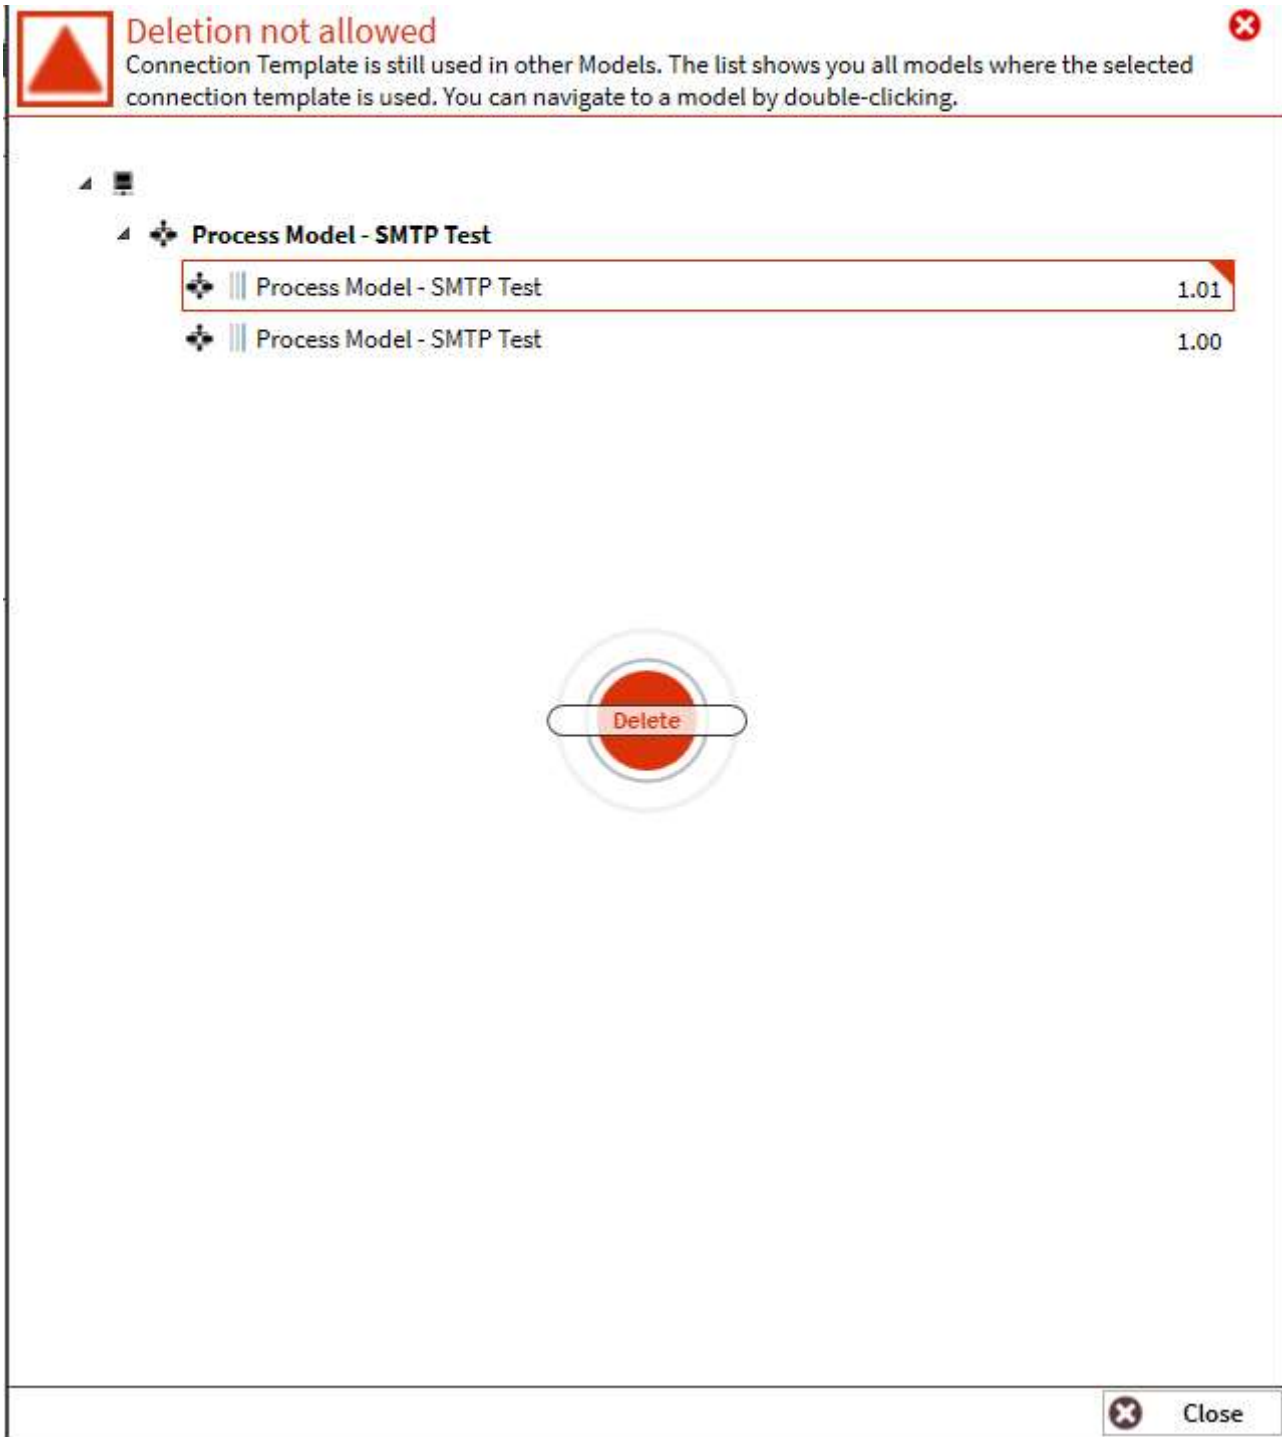

Data Connections

Preferences << Business entity mappings Connection Templates **Credential Templates**

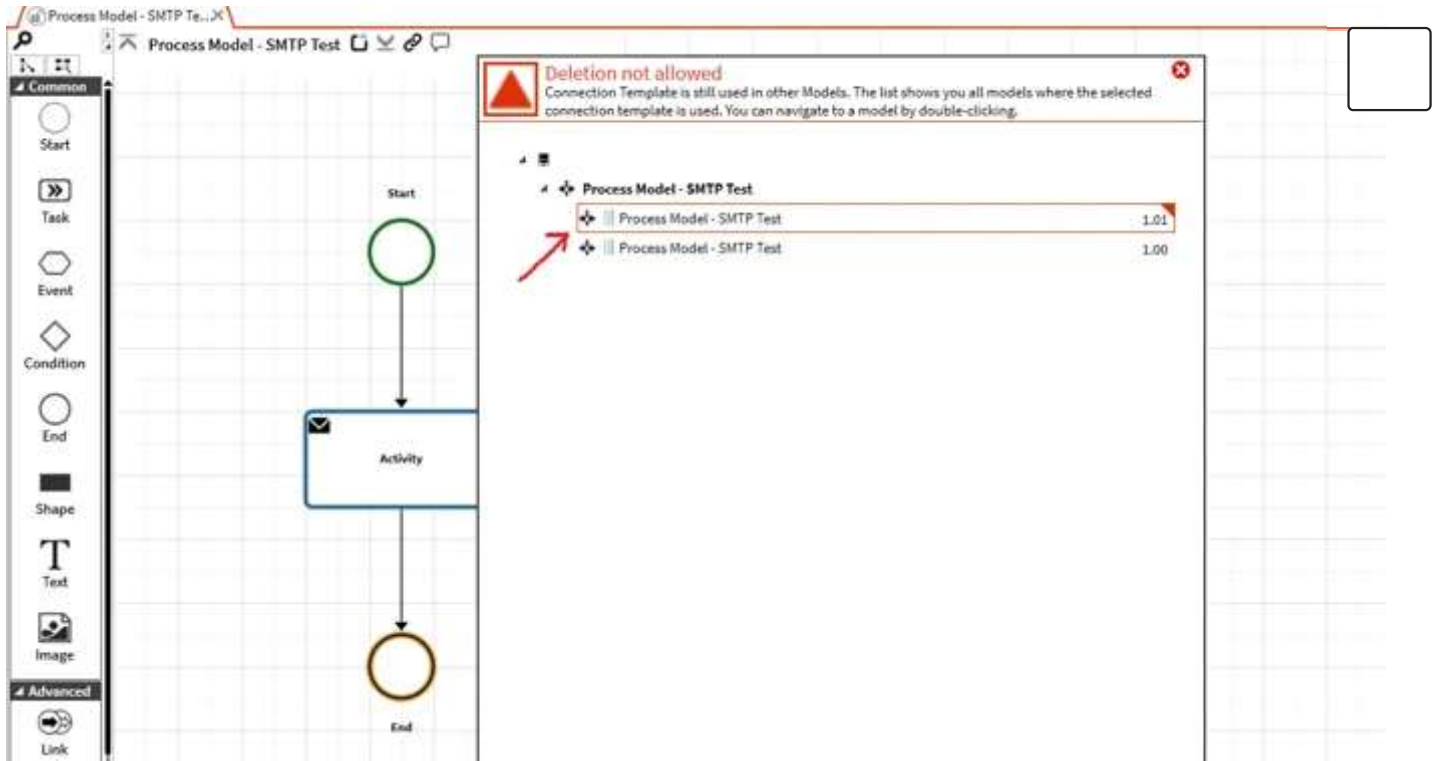

Name	Description
▶ EWS Credentials Template	
▶ Test Cred Template 2	
▶ Cred Mail SMTP Test FS	
▶ EWS Cred Basic	
▶ CredWithoutTemplate	desc

When you click the **Remove** button, a list of model elements is displayed that indicates whether a selected Connection Template is already used:

Double-click to navigate to a Process Model with the Model that contains the selected Connection Template.

Double-click on the element in Modal dialog to open a Model that contains the selected Connection Template.

Now you can update the Model to use another Connection Template if needed.
