FireStart TaskList content type for SharePoint Online

The FireStart Task content type is needed to enable the deployment of FireStart Tasks to SharePoint Online task lists.

The content type can be found within the Resources folder of the FireStart installation.

Follow these steps to enable the FireStart content type on your SharePoint Online system:

1. Upload the **fs-task-list-content-type.sppkg** package to your **Apps for SharePoint** site

2. Add the FireStart content type App to a site where you want to enable the FireStart content type.

3. Under List Settings->Advanced Settings enable content types for the list.

Content Types

Specify whether to allow the management of content types on this list. Each content type will appear on the new button and can have a unique set of columns, workflows and other behaviors.

Allow management of content types?

● Yes   ○ No

4. Add the content type to a list. Make sure that the SharePoint content type "Task" is also added, as both SharePoint and FireStart use some fields together.

Select site content types from:
